Professional Summary

Dedicated Computer Science student from Pakistan with a strong interest in programming and cybersecurity. Experienced in building beginner-friendly academic and personal projects. Skilled in C++, Java, Python, MySQL, Data Structures & Algorithms (Java), and computer networking. Motivated to learn by doing, improve problem-solving skills, and explore cybersecurity fundamentals.

Education

Bachelor of Science in Computer Science (BSCS)

Sukkur IBA University, Pakistan
CGPA: **3.69/4.00**
Completed 4th Semester | Entering 5th Semester

Technical Skills

Programming: C++, Java, Python

Data & Algorithms: Data Structures & Algorithms (Java), MySQL

Networking & Security: Computer Networking, Basic Cybersecurity

Tools: Microsoft Word, PowerPoint, Basic Excel, Basic Designing

Projects

Pizza Hut DSA Project – Java management system using arrays, linked lists, queues, priority queues and Dijkstra's algorithm.

Wind Detector Project – Cisco Packet Tracer network simulation for environmental monitoring.

Roshni Game Project – Console-based C++ word guessing game.

Certifications

Deloitte Cyber Job Simulation • Anthropic Claude 101 & AI Fluency for Students • Great Learning • Simplilearn SkillUp • LinkedIn Learning

Interests

Programming, cybersecurity fundamentals, problem-solving, and building hands-on tech projects.
